- Create equal groups and add them together to find the total.
- To use concrete apparatus such as cubes and counters and divide them into equal groups.
- Then draw addition signs in between each equal group to add all of them together.
- Write the correct number sentences underneath each to match the concrete representations – – for example; 'there are 4 equal groups of 3' so 3 + 3 + 3 + 3 = 12.

## Make the following:

Four equal groups of three.

Five equal groups of three.

Four equal groups of two.

Three equal groups of four.

Three equal groups of three.

Five equal groups of ten.

Six equal groups of Five.

Six equal groups of Six.
