

LO: To find the volume of an egg

Consider these points:

-what work have we done recently which gives you clues about how to find the egg's volume?

Write your equipment list here: -

Method: -ask your friends how they are tackling the problem.

1. Estimate the volume (not the weight) of the egg.
2. _____

What was the volume of your egg? _____

How close was your guess? _____

What if...

-you tried again with a boiled/egg? _____

-you found the volume of the yolk, white and shell separately? _____

-you investigated the volume of size small, medium and large eggs Will all size eggs have the same volume? _____

What have you found out? (include photographs to support your reasoning -Use key vocabulary)

Key Vocabulary:

volume full empty more than less than
litres half full contains millilitres
