How to Save a magical bird

Are you tired of hearing birds chirping for help? Are you brave enough to Save a Magical bird from a bright sunny golden cage? If your saying yes just read on to My instructions. Could you please Read this successfully to set a magical bird free. I'm sure it will thank you. The instructions help Me so read on. If you want to trap a magical bird. The instructions will help by step by step guid. Read on please to Save a birds life. Go back and check it again.

What you will need:

. draw a 1m slide.
. draw a magical parashoot bigger for you to go on.
. A Magical clyon crayon
. A magic flying carpet that you can sit on.
. You would need a trap.
. Make sure you have a bigger enough space to run.
. Magical hat our balloon enough size and big.

Chloe

you're AMAZING just the way YOU ARE

Reach high,
for stars lie
hidden in your soul.
Dream deep,
for every dream
precedes the goal.

The effects of Deforestation in the Amazon

introduction

Deforestation is effecting the whole world. Also, it is effecting many people. If deforestation is not stopped climate change will increase badly.

What are the effects of deforestation on animals in the wild?

The Amazon rainforest has 1,300 birds species. Also 427 mamals species. That are also killed due to deforestation. This is because animals lose their home and have no food.

NS- Add parething
NS- More detail.

What are the effects of deforestation on indigenous people?

30 Million people live in the Amazon. If the indigenous people lose trees they will lose their homes, food and medicine sources.

What is the effect of deforestation on green house gases?

Trees absorb 3-4 tons of carbon dioxide and if the trees are cut down they will release carbon dioxide which increases global warming. Global warming is destroying the world.

Title	Effects of Deforestation on the environment	Deforestation on the Amazon
Introduction	- What is deforestation, and what can we do to prevent it? - Rainforests around the world are being lost. - In this leaflet we will investigate the causes and effects of deforestation.	· Deforestation is bad for the Amazon. · Trees are not available to grow back.
What is the effect of deforestation on greenhouse gases?	- The loss of habitat, the lack of trees allows a greater amount of greenhouse gases. - Healthy forests absorb carbon dioxide from the atmosphere. - Deforested areas lose that ability and release more carbon.	· Trees absorb CO2. · Trees release CO2 when they are cut down. · They produce oxygen which we need.
What are the effects of deforation on animals in the wild?	- One effect of deforestation is the loss of animal and plant species due to their loss of habitat. - 70% of land animals and plant species live in forests.	· The animals lose their homes · less food for the animals · come in to contact with people/can die
What are the effects of deforestation on indigenous people?	- The loss of forests has an effect on their lifestyle. - Many Indigenous communities depend on what the forest has to offer. - Food, medicine, building materials, and cultural resources.	· Reduced food from plants · no medicines from trees

Monday 15th January

L.I: To observe changes of state.

Dictionary.

Soluble - Capable of being dissolved or liquefied.

Insoluble - Incapable of being dissolved.

Dissolve - To make a solution of, as by mixing with a liquid.

Solution - The process by which a gas, liquid or solid is dispersed.

Mixture - Any combination or blend of different elements.

Change of state - The process of one state changing to a different one.

Aim.

To see if a solvent and solute will make a state of matter change.

Solvent + solute = Solution

Equipment.

* Beakers
* Test tubes
* Coke
* White vinegar

* Bicarbonate of soda

Method.

1) First, the solvent is added to the beaker which can be water, coke or vinegar.

2) After that, the solute is added to the solution we look at the aspect when they are mixed together.

My prediction.

I predict that the solvent will make the solution fizz and then the solution will turn into a gas.

Findings.

When we made the solution of Cola and bicarbonate there was a small reaction but the solution fizzed and the vinegar had a bigger reaction. In the coke food, the water and spit would do nothing because water is acidic and instead to alcaline which is when nothing happened.

This of code where is the solution we made...

Cosmin
