to the underlined and use the prefixes dis- mis-

to each prefix.

Match the prefix to the correct root word.

	dis	un	mis
zip	unzip ✓	behave	misbehave ✓
able	disable ✓	honest	dishonest ✓
appear	disappear ✓	count	miscount ✓
living	unliving ✓	live	dislike ✓
like	mislike ✓	happy	unhappy ✓
well	unwell ✓	trained	untrained ✓
own	disown ✓	place	misplace ✓

Show your understanding by writing two sentences with:

- a word with the prefix 'dis' in
- a word with the prefix 'un' in
- a word with the prefix 'mis' in

My Mom is disabled. ^{So} she can not help.

My Nan is disabled. ^{So} she can not help.

I am unhappy today.

My ^{house} garden is untidy today.

I misplaced my book today.

My gran misplaced numbers today.

Wednesday 8th March 2023

I found out what the Tudors ate and which foods were available for Tudor times.

My family ~~couldn't~~ ^{couldn't} eat ~~meat~~ ^{meat} and I think it would be in the Tudor times ~~all~~ ^{all} they didn't have ~~meat~~ ^{meat} so much.

They must have had ~~meat~~ ^{meat} and the foods we ~~eat~~ ^{eat} because ~~only~~ ^{only} they didn't have ~~that~~ ^{that} ~~meat~~ ^{meat} and there was no ~~transport~~ ^{transport} and to make sauce like us.

Henry VIII would have got his slaves the brown bread because they were poor.

I would have the white one because I like it.

Henry VIII would have eaten the white bread because he was rich and was the king.

Was it called white bread? No it's called Manchet bread.

I think he had because he stepped up his wife's head. Henry.

R.S. Henry wanted more wives because he wanted more power. Why was this so important to Henry? So they could get the crown in his son.

W.A. Henry, who had a kingdom in his time.

E.H. and Jane Seymour because he had given her a son.

What do you think this could be and why?

I think it's a paining area because in old times people put their feet in mud or clay and put it on the walls and other stuff. Or for putting your own business. I know this because we have learnt this in year 3 and it links to our Egypt. A great connection to your previous learning.

Henry VIII. He was the king of England from 1509 to 1547. He was a very rich man and he had a lot of money. He was a very powerful man and he was a very important man.

Henry VIII was a very powerful man and he was a very important man. He was a very rich man and he had a lot of money. He was a very powerful man and he was a very important man.

Why was the crown only passed from father to son? Women had to take care of the king.

Similarities and differences.

The difference is the one is poor and the other is rich.

The similarities are that they are both men and they are both kings.

The difference is they don't dress the same.

The similarity is that they are both powerful.

Why were paintings used instead of photographs?

V.I.F.E.R.S. They didn't have cameras or the phones.

Katherine of Aragon divorced.

Anne Boleyn beheaded.

Jane Seymour died.

Anne of Cleves divorced.

Katherine Howard beheaded. How did Katherine survive?

Katherine Parr survived. She survived because Henry VII.

They are only animals.

The rich Tudors had more money than poor.

They are always at the animal.

They always eat meat.

They used a spit and placed the animal on it.

For what? A big spit that you put animals on.

Popular Tudor foods: Rich and poor Tudor food.

Swans - Rich Tudors.

Chicken - Rich Tudors.

Carrots - Rich Tudors.

Onions - Rich Tudors.

Pork - Rich Tudors.

Fruits - Rich Tudors.

I would have had the white bread (Manchet bread) and the carrots because I like them.

I would like to try all the Tudor food because I like to try all the Tudor food.

The worst I would say is the pig and meat and because I don't like to have meat.

The difference between the Tudors and the present is that they had a lot of money and we have a lot of money.

The Tudors used salt and sugar to eat but we use a fridge.

Why did Tudors not use a fridge? They didn't use a fridge because they didn't have one.

"You have to know the past to understand the present"

*Believe it
to
achieve it*

I guess you've been wondering where I am? Well let me tell you what happened. On our way home from Manaus the pilot had become extremely sick to the point that he fainted. This has caused the plane to plummet into the Amazon Rainforest. Dont worry im ok i've only got some minor injuries. At first the thought of being stranded all alone in the Amazon Rainforest petrified me. However later on I found out that there were 3 other lucky survivors with me. Con Max and Lila. Con and Lila were about the same age as me while Max was only 5.

I know you must be worried but don't there is no need to worry. We've found food, water and shelter. While we were exploring, we stumbled upon an abandoned den, the roof was kind of broken so we went to collect leaves and vines to repair it. It also seemed like somebody was there before us, but whoever it was is long gone. To our surprise the Amazon River was right next to the den (this means we have an unlimited water supply) Even though we have an unlimited water supply we still have to make sure that the piranhas don't bite or eat us. We've also managed to get food to eat even though it wasn't that appetising we still ate it ... WE HAD TO EAT LARVA GRUB! You heard right LARVA GRUB! I promise that I will never complain about your food again.

We have all decided to build a raft. The plan is to sail down the Amazon River, hopefully this will lead to civilisation . I have a feeling this WILL work and I know it WILL. Hopefully we will see each other soon.

Lots of love your son Fred

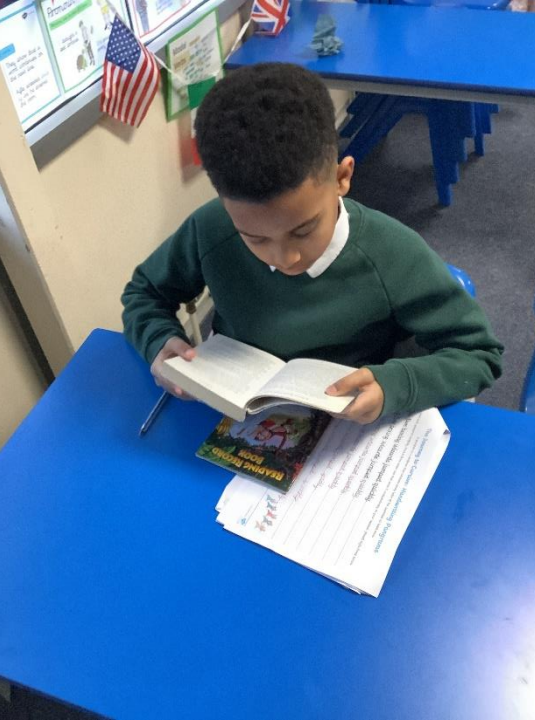

P.S can't wait to see you again and eat your lovely food again

If you put your mind to it, you can accomplish anything.

Without a sound, Lupe and Isabella , cautiously, nervously, sneaked on their tip-toes through the dingy, misty forest with faces red from all the crying they had done. Gnarled and twisted trees rustled behind them whilst blood-curdling screams came from the mountains. Lupe turned desperately hoping that they would survive and the Tibicena would be eradicated from out of sight for all eternity.

“Everything is going to be fine,” said Isabella, reassuringly. As the words left her mouth, Lupe turned around and her face revealed an anxiety.... Shadowy clouds became visible and all of a sudden a boisterous, tumultuous crash hit and it began to hail. The daggers of light became dangerous as it was so close to the girls.

“I'm scared!” cried Lupe, uncontrollably. Isabella held Lupe’s hand and straight away there was a warmth of safety in her body. They continued walking but a sudden, strange noise made them jump.

“I will go and check the noise,” said Isabella, anxiously. Lupe stood there, mouth open, but not a peep was heard... “Isabella!!” Lupe screamed, her voice heading to heaven. No reply.....

As fast as a lightning bolt, Lupe raced back to the mountains, praying to find her father there. When she finally arrived her face was horror-struck when she saw her father lying motionless on the ground, eyes closed, with scratch marks on his chest. “NOOO!,” screamed Lupe, eyes bulging, voice breaking. Her desperate screams soon died as she could hear someone walking next to her but who or what was it? She felt numb. A bony face appeared from behind a rock and, instantly, Lupe felt much safer. It was Pablo!

“Pablo, what should I do? I've lost Isabella and my father is dead!” cried Lupe, desperately. “Let’s go and find Isabella first,” said Pablo, surveying the surroundings for an escape.

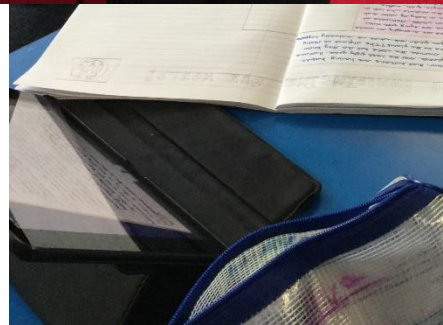

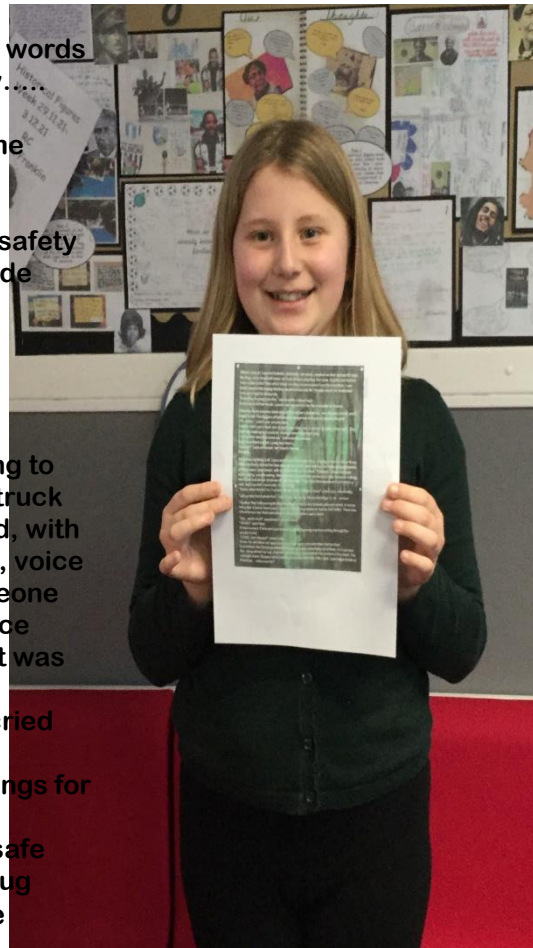

Together they both journeyed into the forest hoping to find Isabella safe and sound. A devastating tear rolled down Lupe’s face but Pablo's hug made her feel an inch better. Immediately, a thunderous roar made shivers run up and down Lupe’s spine.

“Ww...what's that?” questioned Lupe nervously. “OH NO!” said Pablo.

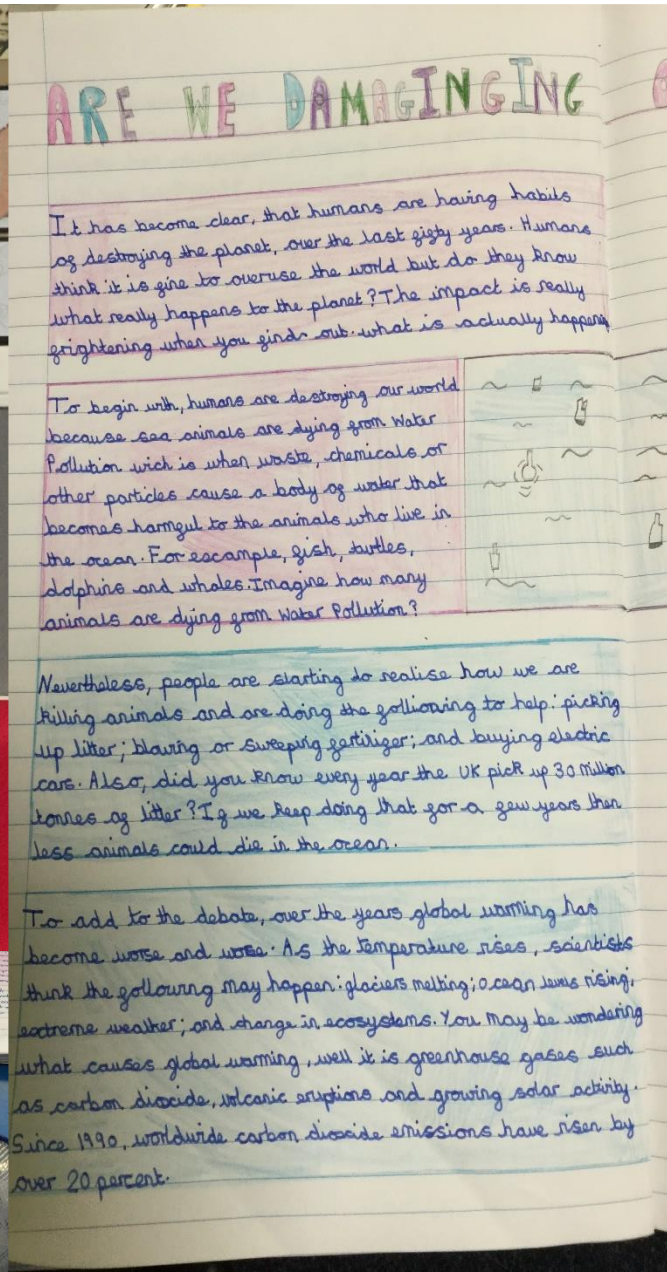

At that moment, Pablo and Lupe looked up at the towering creature lurking through that dreadful forest.

“Is that ..the Tibicena?” asked Lupe .

It was. Its vermilion-red eyes stared into their souls and made them feel terrified. In an instant, the Tibicenas powerful dangerous paws came flying out at them. As Lupe saw this, she grabbed her key (that her dad gave her) and stabbed the creature in the chest. The midnight -black Tibicena came crashing down onto the floor with a thud.

Practice makes perfect. After a long time of practicing, our work will become natural, skillfull, swift, and steady.

Stephen - 6A

Practice

...to study, and place the main parts of the human circulatory system and describe the properties there

Capillaries are the smallest blood vessels in the body and it's here that the exchange of water, nutrients, oxygen and carbon dioxide takes place

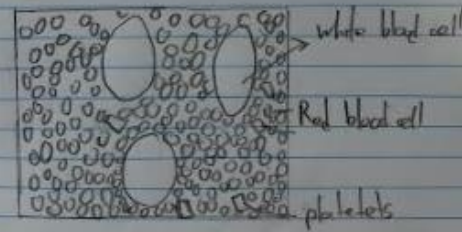

Arteries carry oxygenated blood away from the heart
Veins carry deoxygenated blood towards the heart

The liquid part of blood contains water and protein. This is called plasma.

Red blood cell: blood cell carries from the lungs to all parts of the body. It's a type of blood cell that is made in the bone marrow.

White blood cell: this helps the body fight infections and other diseases. White blood cells are part of the body's immune system.

Platelets: help form blood clots to stop bleeding.

Good work PS
