L.O To divide a 1 or 2 digit number by 100.

Monday: 11/11  
 1. There are 10 hundredths in 1.  
 $20:8 = 2 \frac{5}{4} = 2 \frac{1}{2}$   
 $0.1 = \frac{1}{10} = 10\%$   
 13: 100 = 1300 = 1300%

Guided practice:

1.  $1.45 = 100 = 0.45$  ✓

5KC

7b.  $C = 43^\circ$  because  $231^\circ$  don't go in 45 or 44 but it does go in  $43^\circ$

8.  $36^\circ$

Extension

No I don't agree with tiny because he has added the right angle to Y. ✓

25.4.23

LO: Calculate angles on a straight line

Flashback 4

1.  $160^\circ$  ✓

2.  $270^\circ$  Clockwise ✓

3. 15 ✓

4.  $9 < 9 \frac{2}{6}$  ✓

5.  $XXIV = 24$  ✓

1a.  $100^\circ$  ✓

1b.  $55^\circ$  ✓

1c.  $150^\circ$  ✓

1d.  $98^\circ$  ✓

1e.  $41^\circ$  ✓

1g.  $12^\circ$  ✓

2a.  $140^\circ$  ✓

2b.  $104^\circ$  ✓

2c.  $63^\circ$  ✓

2d.  $141^\circ$  ✓

2e.  $132^\circ$  ✓

2g.  $48^\circ$  ✓

3. Yes I do agree Dara because there is a straight line between A and B.

4a.  $75^\circ$  ✓

4b.  $69^\circ$  ✓

4c.  $100^\circ$  ✓

4d.  $73^\circ$  ✓

5a.  $45^\circ$  ✓

5b.  $30^\circ$  ✓

6.  $23^\circ$  ✓

7.  $60^\circ$  ✓

No I don't agree with Sam and Jack because it's not how big the circle or line is, it's still the same angle.

GT

Sam: Angle a is the smallest and angle c is the greatest

Jack: Angle x is the smallest and angle z is the greatest

Mathematics is the  
**music  
of  
reason.**

-James Joseph Sylvester

MATHEMATICS IS THE MOST BEAUTIFUL  
AND MOST POWERFUL CREATION OF  
THE HUMAN SPIRIT.

STEFAN BANACH

YOU WILL GET THERE  
BUT ONLY IF YOU  
KEEP GOING

2.9.20  
1. To know that vertically opposite angles are equal

Worked 1  
 $a = 130^\circ$   
 $b = 50^\circ$   
 $c = 130^\circ$   
 $d = 50^\circ$

$d = 20^\circ$ ,  $b = 60^\circ$

2. Yes, because they are angles on a straight line which add to  $180^\circ$  and they are vertically opposite angles.

$180^\circ$  because it's an angle on a straight line.

They are the exact same degree.

They are both the same angles.

Vertically opposite angles are equal.

$y = 29^\circ$  because they are vertically opposite angles.

$z = 132^\circ$  because they are vertically opposite angles.

because it is not on a straight line that adds up to  $180^\circ$ .

3.  $70^\circ$  c)  $c = 52^\circ$   
 $d = 116^\circ$

2.9.20  
1. To find angles in a triangle

A scalene triangle has 2 equal sides  
 All sides add up to  $180^\circ$ .

Worked 1  
 $a = 41^\circ$ ,  $b = 92^\circ$ ,  $c = 130^\circ$   
 $d = 42^\circ$ ,  $e = 139^\circ$

Worked 2  
 $z = 41^\circ$  because the triangle has to add up to  $180^\circ$  and  $92 + 47 + 41 = 180$ .

Worked 3  
 $58$ ,  $180$   
 $+ 25 = 180$   
 $180 - 125 = 55$

$y = 97^\circ$  because it needs to add up to  $180^\circ$  and  $58 + 28 + 97 = 180$ .

Worked 4  
 $35$ ,  $180$   
 $90 - 125 = 65$   
 $125 - 65 = 60$

$z = 55^\circ$  because the entire triangle adds up to  $180^\circ$  and  $35 + 90 + 55 = 180$ .

Worked 5  
 $31$ ,  $180$   
 $28$ ,  $59$   
 $59$ ,  $121$

Worked 6  
 $w = 121^\circ$  because the triangle has to add up to  $180^\circ$  and  $31 + 28 + 121 = 180$ .

Think about the whole text.

What impressions do you get of Panelope as she describes her unusual experience?

Give two impressions, using evidence from the text to support your answer.

1. I think she is an curious person because she asked here many who was she body?
2. She is brave because she wasn't scared when tall men were there.
