In the boat, there is a comfy, sluggy warm blanket covering Tranio and Livia.

Everybody screamed help because the scorching, red, impassable lava trickled down the volcano.

After the volcano cooled down all there was dead bodies and people felt scared, petrified and horrified.

While the volcano was erupting the sky was dark, smoky and grey but Tranio and Livia made their way out.

Although the people were running the birds couldn't get out of their cage and they looked worried, terrified and scared.

Without ambition one starts nothing. Without work one finishes nothing. The prize will not be sent to you. You have to win it.

To clearly explain, in simple terms, the 3 main causes of earthquakes.	•	•
To describe some of the effects of earthquakes.	•	•

What causes earthquakes

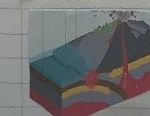

Earthquakes are caused by when tectonic plates rub against each other.

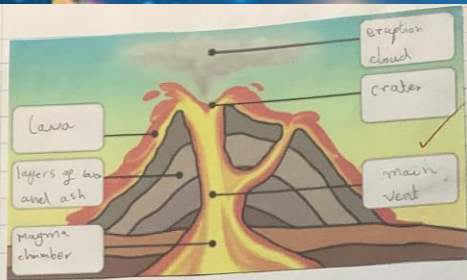

This is a conservative and when the two tectonic plates rub against each other it makes an earthquake.

This is a divergent and when the two plates separate it makes an volcano.

This is a convergent and one plate goes under the earth and the other goes on top of it and it makes an mega volcano and earthquake.

I found the most interesting that a few months ago, a volcano or earthquake happened but formed a new island.

Causes of a volcanic eruption:

A volcano erupts when magma and gases find a new way to escape.

Convergent plate boundaries

As the plate boundaries move away from each other, they create a gap filled with magma.

What happens when a volcano erupts?

Lava can burn and destroy anything in its path. The Ash is so thick that people would struggle to breathe.

I know about sound that we use our ears to listen, to hear people and sometimes for ears. Sounds work in waves and they travel as fast as how light travels.

Pinna - The Pinna is in the outside of the ear and its job is to help the vibrations of the sound enter your ear. ~~Ear Canal~~ The ear canal Ossicles - The Ossicles are tiny bones inside the ear. There are three bones inside your ear that transmit vibrations from the ear drum to the ~~dr. cochlea~~. Ear canal - The ear canal Canal
